Assumptions, Limiting Conditions & Scope of Work

Private
File No.: 22406002

Property Address:	202-3, 533 St., Villa Carolina V Dev	City:	Carolina	State: PR	Zip Code: 00985
Client:	Enrique Rodriguez Hernandez	Address:	3609 Lakeshore Dr, High Point, NC 27265		
Appraiser:	Migdoel Rodriguez-Rivera	Address:	92 Urb. Lakeview Est, Caguas, PR 00725-3320		

STATEMENT OF ASSUMPTIONS & LIMITING CONDITIONS

- The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it. The appraiser assumes that the title is good and marketable and, therefore, will not render any opinions about the title. The property is appraised on the basis of it being under responsible ownership.
- The appraiser may have provided a sketch in the appraisal report to show approximate dimensions of the improvements, and any such sketch is included only to assist the reader of the report in visualizing the property and understanding the appraiser's determination of its size. Unless otherwise indicated, a Land Survey was not performed.
- If so indicated, the appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in the appraisal report whether the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand.
- If the cost approach is included in this appraisal, the appraiser has estimated the value of the land in the cost approach at its highest and best use, and the improvements at their contributory value. These separate valuations of the land and improvements must not be used in conjunction with any other appraisal and are invalid if they are so used. Unless otherwise specifically indicated, the cost approach value is not an insurance value, and should not be used as such.
- The appraiser has noted in the appraisal report any adverse conditions (including, but not limited to, needed repairs, depreciation, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property, or that he or she became aware of during the normal research involved in performing the appraisal. Unless otherwise stated in the appraisal report, the appraiser has no knowledge of any hidden or unapparent conditions of the property, or adverse environmental conditions (including, but not limited to, the presence of hazardous wastes, toxic substances, etc.) that would make the property more or less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied, regarding the condition of the property. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, the appraisal report must not be considered as an environmental assessment of the property.
- The appraiser obtained the information, estimates, and opinions that were expressed in the appraisal report from sources that he or she considers to be reliable and believes them to be true and correct. The appraiser does not assume responsibility for the accuracy of such items that were furnished by other parties.
- The appraiser will not disclose the contents of the appraisal report except as provided for in the Uniform Standards of Professional Appraisal Practice, and any applicable federal, state or local laws.
- If this appraisal is indicated as subject to satisfactory completion, repairs, or alterations, the appraiser has based his or her appraisal report and valuation conclusion on the assumption that completion of the improvements will be performed in a workmanlike manner.
- An appraiser's client is the party (or parties) who engage an appraiser in a specific assignment. Any other party acquiring this report from the client does not become a party to the appraiser-client relationship. Any persons receiving this appraisal report because of disclosure requirements applicable to the appraiser's client do not become intended users of this report unless specifically identified by the client at the time of the assignment.
- The appraiser's written consent and approval must be obtained before this appraisal report can be conveyed by anyone to the public, through advertising, public relations, news, sales, or by means of any other media, or by its inclusion in a private or public database.
- An appraisal of real property is not a 'home inspection' and should not be construed as such. As part of the valuation process, the appraiser performs a non-invasive visual inventory that is not intended to reveal defects or detrimental conditions that are not readily apparent. The presence of such conditions or defects could adversely affect the appraiser's opinion of value. Clients with concerns about such potential negative factors are encouraged to engage the appropriate type of expert to investigate.

APPRAISER'S CERTIFICATION

I certify that, to the best of my knowledge and belief:

- The statements of fact contained in this report are true and correct.
- The credibility of this report, for the stated use by the stated user(s), of the reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions, and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
- I have no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved.
- Unless otherwise indicated, I have performed no services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.
- I have no bias with respect to the property that is the subject of this report or to the parties involved with this assignment.
- My engagement in this assignment was not contingent upon developing or reporting predetermined results.
- My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.
- My analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice that were in effect at the time this report was prepared.
- I did not base, either partially or completely, my analysis and/or the opinion of value in the appraisal report on the race, color, religion, sex, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property, or of the present owners or occupants of the properties in the vicinity of the subject property.
- Unless otherwise indicated, I have made a personal inspection of the property that is the subject of this report.
- Unless otherwise indicated, no one provided significant real property appraisal assistance to the person(s) signing this certification.

Additional Certifications:

DEFINITION OF MARKET VALUE *:

Market value means the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

1. Buyer and seller are typically motivated;
2. Both parties are well informed or well advised and acting in what they consider their own best interests;
3. A reasonable time is allowed for exposure in the open market;
4. Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
5. The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

* This definition is from regulations published by federal regulatory agencies pursuant to Title XI of the Financial Institutions Reform, Recovery, and Enforcement Act (FIRREA) of 1989 between July 5, 1990, and August 24, 1990, by the Federal Reserve System (FRS), National Credit Union Administration (NCUA), Federal Deposit Insurance Corporation (FDIC), the Office of Thrift Supervision (OTS), anc

Beginning Addendum

• GP Restricted Use : Site - Highest and Best Use

Addition to the Highest and Best Use Section

Highest and best use as though vacant: The zoning of the site in which the Subject property is located is "UR", now R-I, "Residencial Intermedio". This zoning allows for residential uses.
Highest and best use as improved: Neither demolition of the existing improvements and redevelopment of the subject site, nor modification of the existing improvements would result in a higher return to the land than that currently being achieved. The existing one-family is therefore concluded to be the highest and best use as improved.

Repairs Comments

The Subject Property is in average conditions.

Ending Addendum

Clarifying Statement in the Scope of Work

The Intended User is the client specified in this appraisal report. The intended use is to evaluate the property that is the subject of this appraisal for assisting the client in establishing a sale price, subject to the stated Scope of Work, purpose of the appraisal, reporting requirements of this appraisal report form, and Definition of Market Value. No additional Intended Users are identified by the appraiser.

Current Owner: The appraiser has relied on the information provided by the clients in order to identify the owner of public record.

Cause of Action:

Any cause of action resulting between the appraiser and the client, in relation to this appraisal, either directly or indirectly, will be limited in damages to the amount of the appraisal fee received for the assignment. Furthermore, it is agreed that you will indemnify Eng. Migdoel Rodríguez d.b.a. Appraisal Advisors Group for any damages, costs, expenses, and attorney's fees resulting from any cause of action by any interested party, other than the client, concerning the appraisal or appraisal report.

Definition of Complete Visual Inspection: In this appraisal the term "Complete Visual Inspection" means that the appraiser inspected those conditions that may have an effect in the market value. This include repairs that can be identified with a visual inspection. Nevertheless, it should be clear that the appraiser is not a "home inspector". The lender, client, and all insterested parties are invited to employ the services of a "home inspector" in order to assure that conditions that are not easily observed in a visual inspection are properly identified and reported.

Physical deficiencies that could affect the livability, soundness, or structural integrity of the property: In this appraisal this phrase means that the appraiser visually inspected the property and look ed for items such as the functional obsolescence, safety issues, external obsolescence, and health issues that may affect the livability of the property, therefore affect the market value of the property, and that can be easily observed in a visual inspection . It also means that the appraiser inspected the property and looked for items such as cracks, humidity, paint defects, infestation with insects that may affect the wood components, plastering defects, loose or missing tiles and settlement that may affect the soundness or structural integrity of the property, therefore affect the market value of the property, and that can be easily observed in a visual inspection. The client is invited to employ the services of a "home inspector" or of a "structural civil engineer" in order to assure that conditions that are not easily observed in a visual inspection are properly identified and reported.

Appraisal Institute Certification:

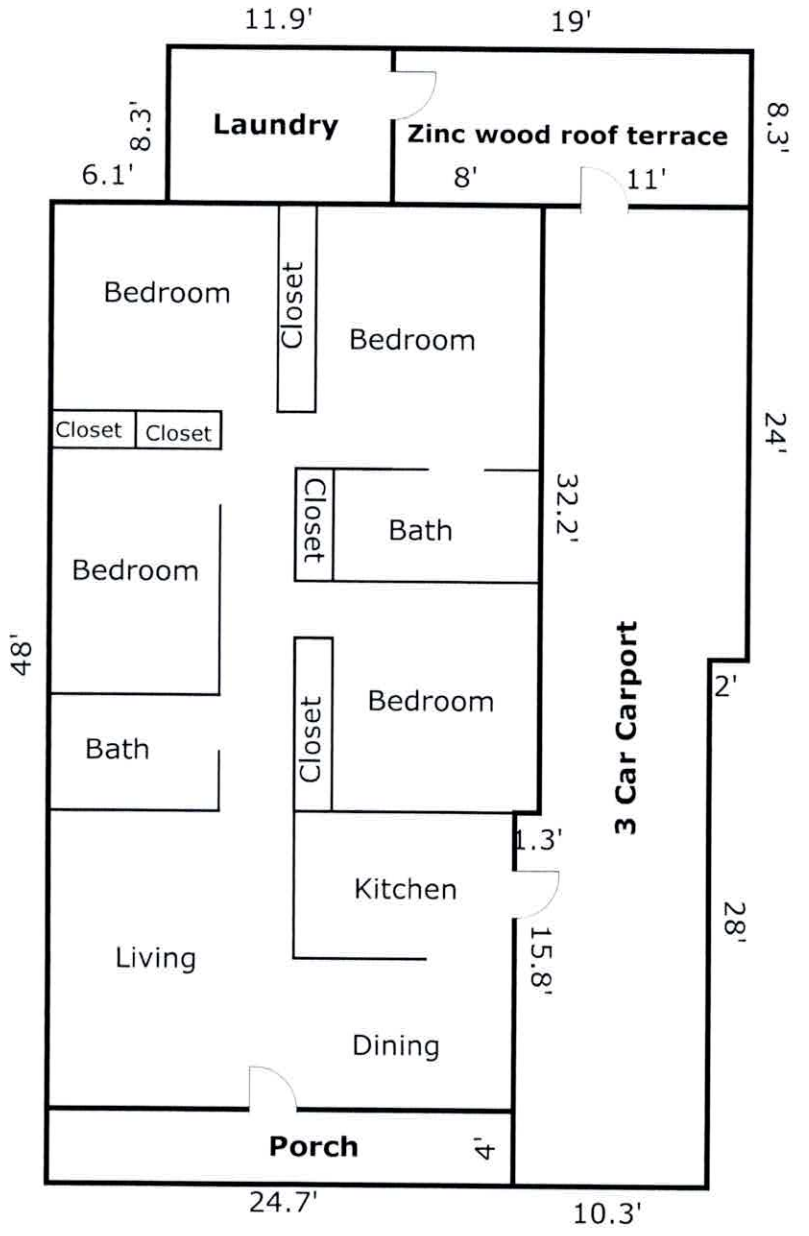

The reported analyses, opinions and conclusions were developed, and this report has been prepared, in conformity with the requirements of the Appraisal Institute's Code of Professional Ethics and Standards of Professional Appraisal Practice, which include the Uniform Standards of Professional Appraisal Practice.

The use of this report is subject to the requirements of the Appraisal Institute relating to review by its duly authorized representatives.

As of the date of this report, Migdoel Rodriguez, SRA, MAI, has completed the continuing education program of the Appraisal Institute.
